

# The Power to Secure

Audio and Video Door Entry Kits • Access Control Systems • Specialised Systems • Special Needs Systems • Electric Door Openers • Accessories

Videx provides an unrivalled range of access control equipment. It will meet the needs of all market sectors with endless opportunities for customisation to ensure the most appropriate solution. The products manufactured range from a basic system, with common speech, to a micro processor controlled, fully isolated, 1000 apartment multi-entrance video and/or audio system with the option of concierge facilities.

Distributors and contractors can also select equipment to build their own systems using the unique Videx Product Build CD software.

### Audio and Video Door Entry Kits

A range of kits is available for prospective buyers of door entry equipment. They are easy to install, offering effective security for many applications. Accessories for customisation are available providing a complete one stop shop for anyone looking to enhance security at home or work.

### Audio and Video Door Entry Systems

Advanced digital intercoms and video intercoms, telephone systems and modular push-button panels are available to provide complete entry system solutions. Specifiers can select from a range of products to match their exact security requirements with customisation opportunities for all systems.

### Electric Door Openers

An extensive range of electric door openers including rim and motorized electro-magnets are available. They have many applications and include the Videx Rim and Mortice, Latches, High Quality Releases, Adams Rite, Assa, Trimec, Cisa and Electromagnets.

### Access Control Systems

Coded access and proximity access control systems use the latest technology and are designed to suit the needs of any project. Vandal resistant and offering exceptional reliability, local authorities and housing associations are increasingly relying on Videx to ensure tenant security.

### Special Needs Systems

Remote control apartment systems for the elderly and disabled are typical Videx special needs solutions. They can replace conventional telephone handsets with remote control providing convenient and reliable door operation. Other options include the very popular 280NT telephone interface and the new scart video kits.

### Door Entry Accessories

Video control units, video intercoms, power supply units including transformers, call tone generators, extension sounders, speech cut off devices and enslavement relays are available.

### Specialised Systems

Typically, Sentry systems are robust and built to withstand vandalism and misuse. They use advanced computer technology which are cost effective, highly reliable and offer the flexibility for extra features to be added later.
